Components of Balanced Literacy. Word Study. Word Study is the study of our alphabetic symbol system. This involves the areas of phonics (letter/sound relationships), morphemic analysis (using word parts to denote meaning), and automaticity for sight words. Word study involves both the decoding (reading) and encoding (phonics and spelling) of our symbol system so students can make meaning from an author's message and convey meaning by creating their own message.

This practical book offers teachers a comprehensive approach to literacy instruction that puts students at the centre of the learning process. Based on the latest learning theories, the book provides: an overview of the nuts and bolts of reading instruction ; techniques for supporting writers ; poetry, storytelling, and drama activities that foster alternate ways of learning ; language experiences that guide students from traditional learning to our complex digital world. This book offers the background and strategies teachers need to encourage students to question, discover, and learn. Thoughtful and inspiring, the book helps educators reflect on their role as teacher and better meet the literacy needs of all their students.

These days, it seems that everyone has a strong opinion about how to teach young children to read. Some may brush off the current tension as nothing more than one more round of "the reading wars." Others may avoid the clash altogether due to the uncivilized discourse that sometimes results. Certainly, sorting the signal from the noise is no easy task. In this leading-edge book, authors Jan Burkins and Kari Yates address this tension as a critical opportunity to look closely at the research, reevaluate current practices, and embrace new possibilities for an even stronger enactment of balanced literacy. From phonological processing to brain research to orthographic mapping to self-teaching hypothesis, Shifting the Balance cuts through the rhetoric (and the science) to offer readers a practical guide to decision-making about beginning reading instruction. The authors honor the balanced literacy perspective while highlighting common practices to reconsider and revise--all through a lens of what's best for the students sitting in front of us. Across six shifts, each chapter identifies a common instructional practice to reconsider explores various misunderstandings that establish and keep that practice in play shares scientific research to support its reconsideration proposes an instructional shift to apply a new perspective, and details several high-leverage instructional routines to support implementation of that shift. By pinpointing gaps and overlaps--as well as common misunderstandings and missed opportunities between the competing lines of thought--Jan and Kari offer busy educators direction and clarification for integrating science and balance into their daily instruction, while keeping meaningful experiences with text a priority.
