books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.

This is a reproducible book of 100 word search puzzles. Each puzzle is based on a theme. Each puzzle has ten words to be studied. There is an illustration for every vocabulary word. There is a space for the student to practice writing the words on it. Each unit has two word search puzzles. One word search puzzle contains only the 10 words without the visual distraction of extra letters on the grid. The other has all the vocabulary words hidden in a grid full of letters. There is a complete Answer Key.

Loaded with information and illustrations on standard and advanced climbing techniques, tools of the trade, rigging, throwline installation as well as a complete section on knots and hitches. For beginners or professional arborists.

Even though the Newtown, Connecticut, police listed Helle Crafts' disappearance as a routine missing person case, Keith Mayo, a private investigator, knew the Danish-born mother of three hadn't skipped town nine days before Thanksgiving. Rita Buonanno remembers the words exactly: "If anything happens to me don't think it was an accident." Helle Crafts was last seen on November 18, 1986. In the style of a brilliant detective novel, Arthur Herzog skillfully re-creates the hour-by-hour circumstantial details that inform this grisly true-crime narrative. We observe dispassionate Richard Crafts as he buys a truck with a pintle hook for towing heavy equipment, promised for delivery before November 18. A day later he reserves a Badger Brush Bandit woodchipper.

From the late 1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, culminating in a secret squadron dedicated to exposing American fighter pilots to enemy technology and tactics. Red Eagles tells the story of this squadron from the first tests of MiGs following the Vietnam War when the USAF had been woefully under-prepared in aerial combat. These initial flights would develop into the "black" or classified program known internally as Constant Peg. At a secret air base in Nevada, ace American fighter pilots were presented with a range of different MiG jets with a simple remit: to expose "the threat" to as many of their brethren as possible. Maintaining and flying these "assets" without spare parts or manuals was an almost impossible task, putting those flying the MiGs in mortal danger on every flight. Despite these challenges, in all more than 5,900 American aircrews would train against America's secret MiGs, giving them the skills they needed to face the enemy in real combat situations. For the first time, this book tells the story of Constant Peg and the 4477th Red Eagles Squadron in the words of the men who made it possible.

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she? Darkly comic, startlingly poignant, and utterly original -- this is Kate Atkinson at her absolute best.
