How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

The OPD Second Canadian Edition English/Chinese is an illustrated, theme-based dictionary for second-language learners. This four-colour dictionary defines words through pictures, and presents each new word in

context. The OPD English/Chinese, along with the monolingual workbooks and many other components, can be used as a reference book or as text for high school or adult ESL students at the beginner level. For years, the first monolingual Canadian edition of the OPD has been the industry leader among picture dictionaries. The second edition expands on the topics covered, providing more depth of vocabulary in the areas that matter most to students and offers Chinese speakers the additional advantage of having words and phrases defined in their native language. The illustrations have been completely updated in a more realistic style that is visually

appealing to adult learners. The second edition also contains two new features: Introductory Pages and Story Pages. The Introductory Pages have been added to the beginning of each theme to give lower-level students a basic overview of key vocabulary words, and to give a starting point for discussion and an introduction to the theme for more advanced students. The Story Pages consist of a two-page spread at the end of each theme to help students use the words in context and practise their reading skills. The OPD English/Chinese is designed for use both in and out of the classroom. Speaking exercises are presented throughout the OPD to allow students to practise new

vocabulary in pairs or small groups, while the pronunciation guide in the index allows students to check their pronunciation when they are studying on their own.

A celebrated work by the greatest poet of classical Tamil literature Tiruvalluvar probably lived and wrote between the second century BC and the eighth century AD though his dates have not been conclusively established. The work by which he is known, the Kural, comprises

1,330 couplets and is divided into three sections—Virtue, Wealth and Love—and is based on the first three of the four supreme aims prescribed by Hindu tradition: dharma (virtue), artha (wealth), kama (love) and moksha (salvation). Taken together, the three books of the Kural inform, criticize and teach the reader, in brilliantly styled and pithy verse, about life, love and the ways of the world. Translated and edited with an introduction by P.S. Sundaram
