With over eighteen (18) years of clinical experience in diagnostic radiography and with over ten (10) years' experience in Radiography education, Dr. Derick Sule identifies radiography students' transition from classroom learning to clinical learning as the greatest problem in radiography education. Thus, this book not only emphasizes the importance of curriculum content and its delivery but also sees the integration problem as an infrastructural level issue, for which recommendations are proposed to educational developers to consider radiography curriculum restructuring, the formal teacher training of instructors, the establishment of dual role lecturer/clinical radiographers and collaborative partnerships between academic and health institutions involved in radiography education.

roles, clinical patient care topics, safety topics, including legal considerations, e.g. infection prevention and equipment. It includes a section with topics impacting the patient experience and a section on professional topics, e.g. cybersecurity, social media, research/outcomes, interprofessional collaboration, workplace violence and current trends in imaging. The authors include advanced practice providers, radiology nurse managers, educators, physicians, a physicist, a dentist, attorneys, a child life specialist, administrators and a social worker. Radiology diagnostic examinations and therapeutic procedures have become a more prominent part of patient care due to advances in technology and the ability of radiology to provide services that were traditionally done in surgery or not done because of limited knowledge. Many procedures are facilitated by the radiology nurse from initial consult to transfer to a hospital unit or discharge and follow-up. Nurses assess, monitor, administer sedation/other medications and respond to emergencies. They serve as educators, researchers, and resource personnel to the radiology department and in many instances, to the entire facility. Radiology nurses are real leaders. In order to keep up-to-date on new developments, nurses need new literature to support their clinical expertise and leadership. This book is an unparalleled resource, written by experts in their areas of interest.
