This fully revised new edition covers the complete radar/ARPA installation and serves as the most comprehensive and up-to-date reference on equipment and techniques for radar observers using older and newer systems alike. Suitable for use as a professional reference or as a training text, the book covers all aspects of radar, ARPA and integrated bridge systems technology (including AIS, ECDIS and GNSS) and their role in shipboard operations. It is a valuable resource for larger vessels and also covers the needs of leisure and amateur sailors for whom this technology is now accessible. Radar and ARPA Manual provides essential information for professional mariners, including those on training courses for electronic navigation systems and professional certificates internationally. Reference is made throughout to IMO (International Maritime Organization) Performance Standards, the role of radar in navigation and in collision avoidance, and to international professional and amateur marine operations qualifications. The most up-to-date book available, with comprehensive treatment of modern radar and ARPA systems and ECDIS (Electronic Chart Display & Information Systems) Full coverage of IMO performance standards relating to radar and navigational technology on new and established vessels Covers best practice use of equipment as well as underlying principles, with essential mathematics and complicated concepts illustrated through the use of clear illustrations

The principles of navigation have not changed, but the art of navigation has. With the right training and to some degree the right ECDIS, you can replace paper charts with an ECDIS in all operating conditions - even when GPS is unavailable. This manual is about sharing best practice and ensuring that the transition is efficient and safe.

Chapter V of the International Convention for the Safety of Life at Sea (SOLAS V) has been substantially revised. The new Regulations will come into force in the UK on 1 July 2002 under the Merchant Shipping (Safety of Navigation) Regulations 2002, and will replace the 1974 Chapter V (SOLAS V/74) Regulations. The Regulations apply to all UK ships on all voyages and to all other ships while they are in UK waters. This publication contains the full text for each Regulation, as determined by the International Maritime Organisation (IMO), along with explanatory guidance notes. It has been prepared to provide practical guidance to ship-owners, masters, crews and the shipping industry on the implementation of the new SOLAS Regulations.

Electronic navigation, although still relatively new, is becoming increasingly more common, particularly on commercial vessels. This handbook offers a wealth of detailed information about how different charting systems operate and answers the most commonly asked questions regarding electronic charts (ENC, RNC, DNC) and electronic chart systems (ECD)

International cooperation on the health of seafarers began many years ago. As early as 1921, an international convention regarding this matter was presented to governments of maritime countries for

ratification. The First World Health Assembly, in 1948, recommended that WHO should establish, with the International Labour Office, a Joint Committee on the hygiene of seafarers. The first session of this Committee, held in 1949, defined the problems affecting the health of seamen and made a number of recommendations. In the opinion of this Joint Committee, the health of seamen called for international attention for a number of reasons. By the nature of his work, the seafarer is obliged to travel from country to country and is exposed to great variations of climate and also to any disease that may be prevalent in the port of call. He may therefore become a carrier of disease, so that the protection of his health is of importance not only to himself and the other members of the crew but also to the populations of other countries he visits. Yet, on account of the nature of his employment, it is difficult to provide the seafarer with the same standard of health care that is generally available to other sections of the population.
