Stories from the Street is a theological exploration of interviews with men and women who had experienced homelessness at some stage in their lives. Framed within a theology of story and a theology of liberation, Nixon suggests that story is not only a vehicle for creating human transformation but it is one of God's chosen means of effecting change. Short biographies of twelve characters are examined under themes including: crises in health and relationships, self-harm and suicide, anger and pain, God and the Bible. Expanding the existing literature of contextual theology, this book provides an alternative focus to a church-shaped mission by advocating with, and for, a very marginal group; suggesting that their experiences have much to teach the church. Churches are perceived as being active in terms of pastoral work, but reluctant to ask more profound questions about why homelessness exists at all. A theology of homelessness suggests not just a God of the homeless, but a homeless God, who shares stories and provides hope. Engaging with contemporary political and cultural debates about poverty, housing and public spending, Nixon presents a unique theological exploration of homeless people, suffering, hope and the human condition.

The population of Mexican-origin peoples in the United States is a diverse one, as reflected by age, class, gender, sexuality, and religion. Far from antiquated concepts of mestizaje, recent scholarship has shown that Mexican/Chican culture is a mixture of indigenous, African, and Spanish and other European peoples and cultures. No one reflects this rich blend of cultures better than Chican rappers, whose lyrics and iconography can help to deepen our understanding of what it means to be Chican or Mexican today. While some identify as Mexican mestizos, others identify as indigenous people or base their identities on their class and racial/ethnic makeup. No less significant is the intimate level of contact between Chicanos and black Americans. Via a firm theoretical foundation, Pancho McFarland explores the language and ethos of Chican/Mexican hip hop and sheds new light on three distinct identities reflected in the music: indigenous/Mexica, Mexican nationalist/immigrant, and street hopper. With particular attention to the intersection of black and Chicano cultures, the author places exciting recent developments in music forms within the context of progressive social change, social justice, identity, and a new transnational, polycultural America.

From the first rap battles in Seattle's Central District to the Grammy stage, hip hop has shaped urban life and the music scene of the Pacific Northwest for more than four decades. In the early 1980s, Seattle's hip-hop artists developed a community-based culture of stylistic experimentation and multiethnic collaboration. Emerging at a distance from the hip-hop centers of New York City and Los Angeles, Seattle's most famous hip-hop figures, Sir Mix-a-Lot and Macklemore, found mainstream success twenty years apart by going directly against the grain of their respective eras. In addition, Seattle has produced a two-time world-champion breaking crew, globally renowned urban clothing designers, an international hip-hop magazine, and influential record producers. In Emerald Street, Daudi Abe chronicles the development of Seattle hip hop from its earliest days, drawing on interviews with artists and journalists to trace how the elements of hip hop-rapping, DJing, breaking, and graffiti-flourished in the Seattle scene. He shows how Seattle hip-hop culture goes beyond art and music, influencing politics, the relationships between communities of color and law enforcement, the changing media scene, and youth outreach and educational programs. The result is a rich narrative of a dynamic and influential force in Seattle music history and beyond.
