This heavily illustrated manual provides a timely, in-depth review of the art of sniping in war and antiterrorist environments. Drawing on a vast, firsthand knowledge of sniper skills, former British Army sniper and sniper instructor Mark Spicer describes the role of the sniper in peace and in war, in reconnaissance and counter-surveillance, in cities, in vehicles, at night and by day. He presents crucial information about training and equipment, judgment and positioning, details of great relevance to professional marksmen, both military and law enforcement. This comprehensive manual will also be of interest to hunters, weapons enthusiasts, competition shooters, and paintball participants. The book is complimented by 280 full color illustrations, diagrams, and related information.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

"A contemporary romance novel set in Chicago and Napa Valley"--

Stand by as Riley prepares to kick some serious demon butt for the last time in this thrilling, dramatic and sexy conclusion to the Demon Trappers series. Riley's always known that Beck had a chequered history, but she's not prepared for what it actually means to be in love with a guy with this many dark secrets. Now that he's finally admitted to himself that he's in love with her too, there's no more hiding the truth about his past. And as it turns out, fending off a demon apocalypse is nothing compared to what's to come...

Creating Effective Learning Environments takes curriculum development to another level: it fills the gap between theory and practice. This text helps readers see the curriculum from a child's perspective and understand how that perspective is linked to learning and theory. It is the author's view that the centre of any curriculum is the child; this text begins not with general theories or applications that are suitable for many, but with each individual child. The theory and methodology of this text are integrated around the actual experiences of children, presented in a logical flow, and embracing current philosophies about integration, play, bias, and learning practices.

This version of the primary text (published in 2014) adds a chapter of Sturm Liouville theory and problems to the current manuscript. This coverage creates a Boundary Value Problems version to add this coverage for instructors who look to offer it in the Ordinary Differential Equations course.

'Clothing that is not purchased or worn is not fashion' (to paraphrase Armani) Knowledge of marketing is essential to help ensure success and reduce the risk of failure in fashion. For the designer starting up in business, this book offers a guide to the major decisions that will enable you to fulfil your creative potential and be a financial success: What are the major trends we should be monitoring?; How should we set our prices?; What is the most effective way to get our message across about the new product range?; Which colour-wash will be the most popular with buyers? Marketing is now a firmly established element of most fashion and clothing courses. Fashion Marketing is written to meet students' requirements and has many features making it essential reading for anyone involved in the fashion and clothing business: · deals with contemporary issues in fashion marketing · up-to-date examples of global good practice · exclusively about fashion marketing · a unique contribution on range planning with a practical blend of sound design sense and commercial realism · a balance of theory and practice, with examples to illustrate key concepts · clear worked numerical examples to ensure that the ideas are easily understood and retained · over 50 diagrams · a glossary of the main fashion marketing terms and a guide to further reading · a systematic approach to fashion marketing, not hyperbole or speculation. The new edition has been updated throughout with new material on different promotional media, visual marketing and international marketing
