The new edition of this AJN Book of the Year provides in-depth, research-based discussions of the major interventions from the Nursing Interventions Classification (NIC), along with the associated NANDA Diagnoses and Nursing Outcomes Classification (NOC) for each intervention. Consistent format from chapter to chapter makes the book an ideal classroom text. Uses case studies and activities to explain how to implement each intervention. Reviews the research base for 43 interventions of which are completely new to the book.

This book seeks to provide a common understanding of health education disciplines and related concepts. It also offers a framework that clarifies the relationship between health literacy health promotion determinants of health and healthy public policy and health outcomes. It is targeted at health promotion and education professionals and professionals in related disciplines.

The extensively updated third edition of Pediatric Epilepsy: Diagnosis and Therapy continues to be the definitive volume on the diagnosis, treatment, classification, and management of the childhood epilepsies. Written by nearly 100 international leaders in the field, this new edition progresses logically with major sections on the basic mechanisms of the disease, classification, epidemiology, etiology, diagnosis, and age-related syndromes of epilepsy. The core of the new third edition is its completely updated section on antiepileptic drugs, including an in-depth discussion of dosage considerations, drug toxicity, teratogenicity, and drug interactions, with recommendations for optimal combinations when multiple drug therapy is required. Features unique to the third edition include: Expanded section on the basic science and mechanism of epilepsy Completely updated drug chapters, including newly released drugs and those in development Expanded chapters on vagus nerve stimulation and surgical treatment Expanded section on co-morbidities The third edition includes 21 new chapters, including discussions of: epileptic channelopathies; epileptogenic cerebral cortical malformation; epilepsy genes; etiologies and workup; evidence-based medicine issues related to drug selection; Levetiracetam; Sulthiame; Pregabalin; herbal medications; basic and advanced imaging; immunotherapy issues; vagus nerve stimulation therapy; cognitive and psychiatric co-morbidities and educational placement; and psychosocial aspects of epilepsy.

Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based care in line with the current NMC competencies, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care. Written, and edited by leading nurses from practice, education and research, it focuses on common diseases, fundamental health needs, and symptoms that nurses' encounter in daily practice. Conditions are clearly explained so that the causes of ill health are easily understood. Every chapter covers pathophysiology, indicates the key priorities for nursing assessment, and discusses 'what the evidence says', before considering nursing management options. Throughout the authors' clear signposts to trustworthy evidence mean that students can effortlessly select the best nursing interventions for their patients using the current available evidence-base. The ideal guide for students preparing for registration and newly qualified staff going through preceptorship, it is packed with over 115 illustrations and lots of features to bring the subject to life and make learning easier: BLNursing assessment illustrations outline challenges caused by common diseases in a helpful and memorable way, highlighting issues that need assessment BLRed flag icons indicate the warning signs of deterioration and urgent questions are listed that can be used for assessment and monitoring BLCase studies of effective evidence-based interventions show the difference that high quality nursing care makes BLCross references between common conditions' causes and managing related health needs and symptoms develop understanding by clearly linking pathophysiology with nursing management options BLTheory into practice boxes further enhance learning through suggested activities, such as exploring key evidence, considering major practice issues or applying core knowledge while out on placement BLOnline resource centre at www.oxfordtextbooks.co.uk/orc/bullock /. Filled with interactive and useful e-learning resources to help students test their learning, keep up-to-date with the latest evidence and further expand their knowledge, it features: BLClinical decision making scenarios BLQuiz questions BLUpdates to content BLHyperlinked references BLImages from the book BLLecturer resources

Learn the concepts and skills you need to provide excellent nursing care! Fundamentals of Nursing, 10th Edition prepares you to succeed as a nurse by providing a solid foundation in critical thinking, clinical reasoning, nursing theory, evidence-based practice, and patient-centered care in all settings. With illustrated, step-by-step guidelines, this book makes it easy to learn important skills and procedures. Care plans are presented within a nursing process framework, and case studies show how to apply concepts to nursing practice. From an expert author team led by Patricia Potter and Anne Perry, this bestselling nursing textbook helps you develop the understanding and clinical reasoning you need to succeed in the classroom and in your career.

Preparing students for successful NCLEX results and strong futures as nurses in today's world. Now in its 12th edition, Brunner and Suddarth's Textbook of Medical-Surgical Nursing is designed to assist nurses in preparing for their roles and responsibilities in the medical-surgical setting and for success on the NCLEX. In the latest edition, the resource suite is complete with a robust set of premium and included ancillaries such as simulation support, adaptive testing, and a variety of digital resources helping prepare today's students for success. This leading textbook focuses on physiological, pathophysiological, and psychosocial concepts as they relate to nursing care. Brunner is known for its strong Nursing Process focus and its readability. This edition retains these strengths and incorporates enhanced visual appeal and better portability for students. Online Tutoring powered by Smarthinking—Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

This new edition, the latest volume from our Current Clinical NeurologyTM series, takes readers through the process of treating neurological conditions from evaluation to emergencies. For each condition, the author provides basic facts, key definitions, step-by-step instructions for conducting a concise physical examination, neurologic signs to watch for, treatment strategies, and the prognosis.

For all courses in maternal and child nursing care in any nursing program. This dynamic, up-to-date text offers an integrated framework and philosophy for teaching the nursing of childbearing families and nursing of children together. Accurate, readable, and concise,Maternal & Child Nursing Caresupports faster and more efficient learning in briefer, more compressed courses; while helping students develop essential skills for fast-changing healthcare environments. Core themes in this edition include family-centered and community-based care; health promotion (including Healthy People 2020); patient and family education; clinical reasoning; evidence-based practice, and developing cultural competence. This edition adds new Safety Alerts; more coverage of pain as the fifth vital sign; greater focus on care of families where a child is dying; and updated content on assessment, nutrition, communication, and many other key topics. Multiple pedagogical tools help students focus both learning and review, including intuitive Pathophysiology Illustrated visuals; Family Quotes presenting the family ' s perspective; Learning Outcomes and Critical Concept Review Features; Key Terms, and an online audio glossary.

A concise synopsis of all major forms of therapy and treatment associated with epilepsy affecting both children and adults.
