An easy to follow guide to restoring a classic Mazda MX-5/Miata - the world's favourite small sports car. This book takes you step-by-step through choosing a project car, looking the car over, planning the restoration, and buying parts and tools to perform the work. The comprehensive text is fully supported by high-resolution photographs, guiding you through stripping the car down, cutting out and repairing rust, restoration of interiors, replacing the hood, refurbishing the underside of the car including the floor pan, suspension, brakes, undersealing, reassembly, replacing the cam belt and waterpump, replacing engine seals and gaskets to cure common leaks. It also provides a guide to handy upgrades as you go along. Whether you are looking to restore to original condition or build an out-and-out track weapon, the techniques described in this book will assist you in getting the right base to start with. The book is based on an actual restoration of a vehicle carried out by the author, with before and after shots.

Nissan: Patrol Series GQ, 3.0 & 4.2 petrol & 4.2 diesel. Ford: Maverick Series DA. Petrol & diesel models. Does NOT cover UK Ford, Maverick, or Nissan Terrano.

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

Now there's another way to get more horsepower: boring and stroking your Mopar small block to get more cubic inches - up to 476 cubes! The small block Mopar is one of the easiest engines in which to increase displacement without extensive modifications or specialized machine work - the engine was practically designed for more cubes! This book shows you how to get that big-cube power, and then it shows you how to optimize the small-block's other systems - induction, heads, valvetrain, ignition, exhaust, and more to make the most of the extra cubic inches. Author Jim Szilagyi is a Performance Specialist for Dodge Motorsports and Mopar Performance Parts. In this book he covers building big-inchers from Mopar 318/340/360-ci LA or Magnum 5.2-/5.9-liter engines, using both factory and aftermarket parts. If you want to make big power from your Mopar small-block, this is the book for you!

Vehicle maintenance.

This is the definitive history of the first generation Mazda MX-5 - also known as the Miata or Eunos Roadster. A fully revised version of an old favourite, this book covers all major markets, and includes stunning contemporary photography gathered from all over the world.
