This guide covers all the exam-assessed content on the OCR Gateway science specification. It is designed to help students get the most out of their revision. Information is broken down into manageable chunks and higher tier material is clearly differentiated on the page.

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the IGCSE Chemistry syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

The Fiber Optic Reference Guide offers readers a solid understanding of the principles of fiber optic technology, especially as it relates to telecommunications, from its early days to developing future trends. Using a minimum of jargon and a wealth of illustrations, this book provides the underlying principles of fiber optics as well as essential practical applications. The third edition is updated to include expanded sections on light emitters, semiconductor optical amplifiers, Bragg gratings, and more systems design considerations. Fiber optics plays a key role in communications, as well as in broadcast and cable systems. Engineers working with fiber optics as well as newcomers to the industry will find the third edition of this reference guide invaluable. It will help the reader develop a solid understanding of the underlying principles of this rapidly changing technology as well as its essential practical applications. The text is thoroughly indexed and illustrated.

Have fun with electricity, magnetism and light; Learn about machines and technology with hands-on activities and experiments. This fascinating series for grades 3 through 8 covers studies in motion, energy and technology.

Edexcel Biology for A2 is a full colour textbook with supporting Dynamic Learning website, written specifically for the new Edexcel specification. The chapters follow the order suggested by the concept approach to the course. All chapters begin with Starting points, which summarise the basics to be covered and How Science Works examples are clearly identified. Throughout the text there are a wide range of self-assessment questions to encourage comprehension and research. The Dynamic Learning website additionally provides: - Practice material for pre-released reading assessment - Additional activities - How science works material - Extension questions to stretch the most able and extension material explaining some ideas in greater depth - Useful websites linked to each section
