If you read technology news, you ' ll notice it ' s not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old

survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I ' ve collected what happened in the industry in 2013 and make predictions on what will and won ' t happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I ' m surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology

industry for your consideration along with my own observations and opinions about where things are headed. It ' s often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who ' s up, who ' s down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human

knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore ' s Law, but the real answer is that computers are in their teenage

I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won ' t and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. India is back! With the country ' s general elections in 2014 resulting in a government formed by a new political party, the Bharatiya Janata Party, led by a business-friendly prime minister, Narendra Kumar Modi, the world ' s largest democracy is once again on the minds of business leaders the world over. The renewal of interest in India is all the greater because of what ' s happening in neighboring China. For over thirty years, China was the growth engine for many Western multinational companies, but the combination of a slowing economy, rising wages, and increasing political risk has most companies looking for the

next China. No other country is better positioned to play that role than India. In the short term, though, India will remain a challenging market, with a well-deserved reputation for corruption, uncertainty, and stultifying bureaucracy. Those hurdles are unlikely to go away soon. Yet India may be on the verge of unprecedented growth. Can you afford to wait or should you plunge into this complex market today? What does it really take to win there? How do executives deal with India ' s volatility, uncertainty, and intense competition—and even prosper from it? Ravi Venkatesan, the former Chairman of Microsoft India and Cummins India, offers expert advice on how your company can overcome the unique challenges of the Indian market. He argues that India is in fact an archetype for most

developing nations, many of which present similar challenges. Succeeding in India is important not just because it is a big market but also because it is a litmus test for your corporation ' s ability to succeed in other emerging markets. If you can win in India, you should be able to win anywhere. Hard as these frontier markets are, Venkatesan argues, the bigger hurdle may well be the internal culture and mind-set at a multinational ' s headquarters. The unwillingness to make a long-term commitment or to adequately trust local leadership, combined with the propensity to rigidly replicate the products, business models, and operating systems that have worked at home, drives many companies into a “ midway trap. ” That often results in India remaining an irrelevantly small contributor

to the company ' s global growth and profits. Combining personal experience and in-depth interviews with CEOs and senior leaders at dozens of companies—including Microsoft, GE, JCB, Dell, Honeywell, Volvo, Bosch, Deere, Unilever, and Nestlé—Venkatesan shows you how to tackle political changes, policy uncertainty, and corruption and thrive in India. He proves that you can break through, but it takes a very different type of leadership, both locally and at corporate headquarters. If you want to succeed in the twenty-first century, you must succeed in emerging markets. This practical book, written by one of India ' s most respected CEOs, gives you the keys to win in India, other emerging markets, and, indeed, globally.
