A wine book unlike any other, THE FOOD LOVERS GUIDE TO WINE offers a fresh perspective via the single aspect of wine most compelling to food lovers: flavor. At the heart of this indispensible reference, formatted like the authors' two previous bestsellers The Flavor Bible and What to Drink with What You Eat, is an encyclopedic A-to-Z guide profiling hundreds of different wines by their essential characteristics-from body and intensity to distinguishing flavors, from suggested serving temperatures and ideal food pairings to recommended producers (including many iconic examples). The book provides illuminating insights from dozens of America's best sommeliers via informative sidebars, charts and boxes, which complement the book's gorgeous four-color photography. Another groundbreaking work from two of the ultimate culinary insiders, this instant classic is the perfect gift book.!--EndFragment--

Whether you're an experienced backcountry skier or intermediate snowboarder looking to ramp up your out of bounds expeditions, Brittany and Frank Konsella have the cred to guide you to the state's special runs. "A guide to the press of the United Kingdom and to the principal publications of Europe, Australia, the Far East, Gulf States, and the U.S.A.

* Reading clouds, wind patterns, snow conditions, and other clues, pre-trip and on the mountain * Strategies for safety and survival in adverse weather conditions * Regional mountain weather phenomena to watch for across the U.S. Working as a broadcast meteorologist, author Jeff Renner hears all too frequent reports about weather-related hiking, climbing, and skiing accidents. He'll teach you how to avoid becoming a statistic: all it takes is a little basic weather knowledge, pre-trip planning, and vigilance on the mountain. Renner discusses the best information sources to guide you, clues to watch for in the field, and how to analyze it all, with particular emphasis on potential threats due to thunderstorms, mountain winds, snow, and avalanche hazards. If you do get caught under stormy skies, he'll tell you how to limit your exposure. The book is filled with tip lists and concrete examples. Renner also includes chapters on weather patterns region by region across the U.S., highlighted by reference maps. The book is in the Mountaineers Outdoor Basics series.

A masterful new collection by award-winning poet Russell Thornton. In "Greek Fire," one of the poems in Russell Thornton's astonishing new collection, the central image is of fire burning through water: "water is a bridge / for a fire to come into the world." This image also illuminates the driving force that animates the poems in Answer to Blue. The stillness and quiet depth characteristic of Thornton's poetry are here shot through with an irresistible vitality, a flame of mythic resonance. The past, both ancient and recent, exerts a gravitational pull throughout the collection, with Greek myths, family histories and biblical passages unearthed and examined, forgotten and returned to, giving way in a cyclical rhythm to the transient presence of young children, often caught flitting away just at the edge of vision. With a clarity that pierces through the mist of daily routine, Thornton gives attention to transitional states, pausing at the often rushed-through moments of change, and also examines the phenomenon of perception itself. This collection's response to D.H. Lawrence's question—"Oh what in you can answer to this blueness?"—is both an answer and a challenge, an achievement of beauty that contains the seed of something more enduring and sacred.
