Read your surround sound system's manual. Each surround sound system will have a slightly different set of instructions detailing the best way to set it up. While you can follow general instructions to get decent sound out of your speakers, the best way to optimize them for perfect sound is by reading their manual first.

The left and right speakers provide more lateral, but still highly localized and directed, sound. If possible, the left and right speakers in a surround sound system should be full-range speakers. For the best results, try to position the left and right front speakers so that the tweeters are at ear level.

Manually Set Your Surround Levels with an SPL Meter. There are a few situations in which you may want to take a more manual approach to your surround levels. First, if you have a soundbar, you'll probably have to set the surround levels by hand, since most don't come with an auto-calibration feature.
