There is only one boss. The customer. And he can fire everybody in the company from the chairman on down, simply by spending his money somewhere else. —Sam Walton What do your customers really want? "More for less," of course! They want more value, more service, more consistent delivery, more accuracy, and ever more responsiveness. They want less hassle, less bureaucracy, less sales pressure -- and, they want to pay "less" for this "more." Unless you can provide your customers with "more for less," you can be assured they will find someone else who can, and sooner rather than later. There's no magic to providing more for less, but it requires a management mindset that's different from the norm--and that's precisely what this book is about. The findings in the 2004-2005 Mindset Study, based on exclusive interviews with frontline executives, went into the making of this book. With clarity and insight, Spanyi has penned the definitive guide for business leaders who are determined to deliver more for less to their customers and shareholders.

our digital world. Organizations need a management approach that fits this environment and capitalizes on its opportunities while minimizing the related risks. They need to execute their business strategy fast and reliably. The importance of process innovation, digital technology and people aspects, process governance, internationalization, emerging processes and the unique situation in mid-market organizations are some of the key topics discussed in this book. It ends with a comprehensive case study and a discussion about what process engineers can learn from jazz musicians.

In this step by step guide, former Management Consultant and change management expert Theodore Panagacos walks you through the entire discipline of Business Process Management. Learn how to fast track your organization's strategy to govern processes, create a process culture, and measure business performance. The book addresses executives and managers as well as educators and students.
