Electrical Motor Controls for Integrated Systems continues the long tradition of technical content presented in a user-friendly format. A comprehensive overview of the control industry is augmented with practical applications used in the field. With new, large detailed illustrations, contemporary photographs, and informative factoids, the premier motor control text remains the first choice of electrical training programs.

When your Exam Preparation Class is complete, this simulated exam will help your students see where their strengths and weaknesses are. It is set up with the bubble sheets for their answers and a time frame for each section covering Theory, NEC and Calculations. This really helps you to see how the class is doing as well as show the students their weakness.

Master of Precision is the fascinating firsthand account of Henry Martyn Leland's life and work during the early days of the automobile industry.

The Construction Chart Book presents the most complete data available on all facets of the U.S. construction industry: economic, demographic, employment/income, education/training, and safety and health issues. The book presents this information in a series of 50 topics, each with a description of the
