ZIMSEC O ' Level Specimen Papers November 2019/2021. ZIMSEC O ' Level Specimen Papers November

The author is from the Institute of Development Studies at the University of Zimbabwe. He examines the paradox ensuing from the Lancaster House Settlement at Zimbabwe's independence, that whilst colonial rule was ended, the framework was provided for continued white privilege, on the basis of control of the economy by this elite - and through them, transnational capital. He analyses the responses of the ruling (including official) elite, the black petty bourgeoisie, and the group associated with the former Rhodesian Front.

Emerging from the pioneering work of the African Association for History Education (AAHE-Afrika), Teaching African History in Schools offers an original Africa-centred contribution to existing research and debates in the international field of history education.

This study sheds light on the current state of history education in Africa and reflects on its potential to prepare this continent ' s learners for the challenges of "learning to live together". Drawing on an examination of school curricula and the experiences of educational stakeholders, it identifies trends in the processes and outcomes of recent curricular revisions, and discerns key challenges relating to the teaching and learning of history across Africa. It scrutinises the place afforded to history within African education systems, and surveys related contents and pedagogies. While it identifies African history as a fundamental yet sensitive and controversial subject, it also illustrates examples of present-day curricular strategies to integrating a concern for promoting a "culture of peace".

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe ' s colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo ' s book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis, covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe ' s education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country ' s education. Handel Kashope Wright, Professor of Education, University of British Columbia

This Handbook presents an international collection of essays examining history education past and present. Framing recent curriculum reforms in Canada and in the United States in light of a century-long debate between the relationship between theory and practice, this collection contextualizes the debate by exploring the evolution of history and social studies education within their state or national contexts. With contributions ranging from Canada, Finland, New Zealand, Sweden, the Netherlands, the Republic of South Africa, the United Kingdom, and the United States, chapters illuminate the ways in which curriculum theorists and academic researchers are working with curriculum developers and educators to translate and refine notions of historical thinking or inquiry as well as pedagogical practice.

The first single-volume history of Zimbabwe with detailed coverage from pre-colonial times to the present, this book examines Zimbabwe's pre-colonial, colonial and postcolonial social, economic and political history and relates historical factors and trends to recent developments in the country. Zimbabwe is a country with a rich history, dating from the early San hunter-gatherer societies. The arrival of British imperial rule in 1890 impacted the country tremendously, as the European rulers exploited Zimbabwe's resources, giving rise to a movement of African nationalism and demands for independence. This culminated in the armed conflict of the 1960s and 1970s and independence in 1980. The 1990s were marked by economic decline and the rise of opposition politics. In 1999, Mugabe embarked on a violent land reform program that plunged the nation's economy into a downward spiral, with political violence and human rights violations making Zimbabwe an international pariah state. This book will be useful to those studying Zimbabwean history and those unfamiliar with the country's past.
